

VAASENK

A-Z UI/UX Design System and Product Interface Specification

Web App + Mobile App | Admin + Teacher + Student | Version 0.1

Design North Star

Vaasenk should feel like a warm, intelligent classroom companion - not a boring SaaS dashboard. The experience must be friendly, fast, beautiful, gradient-rich, and simple enough for schools, teachers, and students to use without training.

Document Field	Value
Product	Vaasenk - classroom productivity, notes, AI question papers, and AI classroom assistant
Primary platforms	Responsive web app and mobile app
Primary roles	Admin, Teacher, Student
Mandatory brand colors	#A00000 deep Vaasenk red and #FECA02 Vaasenk gold
Design direction	Warm gradient, glassmorphism, rounded surfaces, friendly illustrations, low cognitive load
Core tagline	Teach more. Copy less.
Prepared for	Design, frontend, product, and engineering implementation

Reference direction 1 - Web dashboard

Use the approved warm gradient dashboard direction: hero greeting, floating classroom cards, AI assistant panel, question paper generator card, syllabus progress, and cream glass surfaces. All visible wordmarks must use Vaasenk.

Reference direction 2 - Mobile app showcase

Use the approved mobile direction: warm red-orange-gold gradients, curved cards, friendly onboarding, role-based flows, AI screen, and bottom navigation. All visible wordmarks must use Vaasenk.

22. 22. Future design roadmap

1. How to Use This Design Document

Purpose

This document is the single source of truth for Vaasenk visual design, interaction design, and role-based screen planning. Designers should use it for Figma decisions. Frontend developers should use it for component creation. Product/backend teams should use it to understand UI states, permissions, and user flows.

Reader	Use this document to answer
Founder / Product owner	What should Vaasenk feel like? Which screens are needed first? What should be consistent across web and mobile?
UI/UX designer	Which colors, gradients, typography, cards, navigation patterns, and screen layouts should be used?
Frontend developer	Which components must be built, what states they need, and which tokens should be used?
Backend developer	Which UI states depend on APIs, permissions, data freshness, uploads, AI jobs, and notifications?
QA tester	What should be checked on each screen before release?

- Do not treat generated concept images as pixel-perfect final screens. Treat them as the visual mood and layout direction.
- Every final screen should be created in Figma before implementation.
- Every repeated UI pattern must become a component, not a one-off screen design.
- Every screen must have loading, empty, error, and success states.
- Every role must only see actions permitted for that role.

2. Product Identity and Design Strategy

Sample documentation learning

The sample files show a useful token-first documentation style: colors, typography, spacing, radius, shadows, components, do/don'ts, and quick-start code. Vaasenk will use the same level of implementation clarity but with its own warm red-gold education identity.

Design Question	Vaasenk Answer
What is Vaasenk?	A smart classroom companion for schools and colleges that saves teaching time, organizes notes, and reduces teacher workload using AI.
What should it feel like?	Friendly, intelligent, energetic, Indian-school friendly, premium, and trustworthy.
What should it not feel like?	A boring enterprise SaaS dashboard, a dull ERP, a cluttered WhatsApp replacement, or a childish game.
Who must like it immediately?	Teachers, students, school admins, and potential education investors.
Why gradients?	Gradients make the product feel fresh and emotionally engaging. They also help turn routine academic tasks into a delightful experience.
Why keep red and gold subtle?	#A00000 and #FECA02 can attract the intended investor visually, but the product must not look political. They must feel like brand energy, not campaign identity.

Reference direction 3 - Web onboarding

Use the approved web onboarding direction: welcome panel, role cards for Admin/Teacher/Student, sign-in panel, soft glow transitions, and trust badges. All visible wordmarks must use Vaasenk.

Reference direction 4 - Common screens

Use the approved common-screen direction: notifications center, profile, settings, help/support, glass cards, warm gradients, and readable layout. All visible wordmarks must use Vaasenk.

3. Core Design Principles

Principle	Implementation Meaning
1. Warm intelligence	AI should feel helpful and friendly, not cold, robotic, or intimidating. Use human wording, soft mascot treatment, and clear safety notes.
2. One-screen confidence	A user should understand what to do within 3 seconds of landing on a screen. Primary action must be obvious.
3. Reduce teacher burden	Teacher interfaces should prioritize quick upload, AI assistance, and classroom shortcuts. Avoid heavy admin work for teachers.
4. Student clarity	Student UI should make notes, bookmarks, downloads, and classroom material easy to find. Avoid complex analytics for students in MVP.
5. Admin control without clutter	Admin UI can be more powerful, but should still use guided flows and step-based setup.
6. Delight without distraction	Gradients, glows, mascot, and motion should support the task, not hide content.
7. Role-first navigation	Admin, teacher, and student should see different dashboards and actions. Generic screens can be shared but content changes by role.
8. Mobile-first classroom usage	Students and teachers in class will use phones. Mobile should be fast, readable, and reachable with one thumb.
9. Safety and trust	AI outputs must include source references, warnings where needed, and clear teacher verification prompts.
10. Buildable beauty	The design can be award-winning, but must still be implementable with Next.js, React Native, Tailwind, and reusable components.

4. Brand System

Brand personality	Helpful Tamil classroom companion, modern Indian edtech, warm AI assistant, premium but approachable.
Brand keywords	Vaasenk, classroom, guidance, speed, trust, warmth, intelligence, growth, learning.
Logo direction	A stylized V that can also feel like a tick, wing, book, or learning spark. Use red as base and gold as accent.
Mascot direction	Friendly Vaasenk AI orb or character. It should feel like a guide, not a toy. Use it in AI, onboarding, support, and empty states.
Tone of voice	Simple, encouraging, helpful, Indian-school friendly. Avoid corporate jargon.

Brand personality	Helpful Tamil classroom companion, modern Indian edtech, warm AI assistant, premium but approachable.
Primary tagline	Teach more. Copy less.
Secondary lines	Learn. Share. Grow. / From board to phone in seconds. / Your smart classroom companion.

Brand Element	Rules
Logo on light background	Use Vaasenk red logo with gold accent. Keep minimum clear space equal to logo height / 2.
Logo on gradient background	Use white or light cream logo if red has low contrast. Add subtle glow only in marketing or onboarding.
Mascot	Use sparingly. Good places: onboarding, AI assistant, empty states, success states, support. Avoid showing mascot in every dense admin table.
Illustrations	Use warm, semi-3D, soft character style. Avoid hyper-realistic human faces in core UI.
Language	Use English-first MVP, but build space for Tamil labels later. Avoid long labels that break mobile cards.

5. Color System and Gradient Rules

Mandatory colors

The product must include #A00000 and #FECA02. Use #A00000 as the primary brand/action red and #FECA02 as gold highlight, progress, notification, and celebratory accent. Keep both tasteful and subtle in professional screens.

Token Name	Value	Usage
Vaasenk Red	#A00000	Primary CTA, active state, logo, important actions, nav active indicator
Vaasenk Gold	#FECA02	Highlights, badges, AI sparkle, progress, notification dots, premium accent
Deep Burgundy	#5A0013	Hero depth, AI panels, strong gradient base
Warm Ember	#FF6B1A	Gradient transition, energetic cards, teacher flow
Rose Coral	#FF5C7A	Student-friendly cards, onboarding glow, soft warnings
Cream Canvas	#FFF7EA	Main page background, safe reading canvas
Soft Blush	#FFF0F4	Secondary panels and empty state backgrounds
Ink Text	#24161A	Primary readable text
Muted Cocoa	#7A6266	Secondary text and placeholder text
Line Sand	#EAD7CF	Borders, separators, subtle dividers
Success Green	#16A34A	Completed, uploaded, joined, verified
Error Red	#DC2626	Failed, delete, expired, invalid input

Gradient	CSS Value	Use Case
Brand Flame	linear-gradient(135deg, #A00000 0%, #D61F2C 45%, #FF7A1A 72%, #FECA02 100%)	Primary CTA, hero cards, login button, AI generator button
Deep AI Glow	linear-gradient(135deg, #3B0010 0%, #780018 45%, #A00000 70%, #FF8A00 100%)	AI assistant panels, generate screens, premium dark cards
Cream Sunrise	radial-gradient(circle at 20% 10%, #FFF4C2 0%, transparent 25%), linear-gradient(135deg, #FFF7EA 0%, #FFE3D2 45%, #FFF0F4 100%)	Page background, onboarding background
Teacher Orange	linear-gradient(135deg, #A00000 0%, #FF7A1A 55%, #FECA02 100%)	Teacher cards, upload screen, classroom cards
Student Coral	linear-gradient(135deg, #FF5C7A 0%, #FF8A4C 60%, #FECA02 100%)	Student cards, note feed, achievement states
Admin Royal	linear-gradient(135deg, #5A0013 0%, #A00000 55%, #FFB000 100%)	Admin institution panels and control surfaces
Glass Surface	rgba(255, 255, 255, 0.72) + backdrop blur 20px	Cards floating over gradients

- Do use gradients for hero cards, classroom cards, AI modules, onboarding, profile headers, and success moments.
- Do not use strong gradients behind long paragraphs or data tables.
- Do keep form fields and large readable content on cream/white glass surfaces.
- Do not make every element red/yellow. Let cream space breathe.
- Do use gold for small signals: badges, progress ring, sparkle icon, notification count, completion highlight.
- Do reserve solid red for primary actions only, not secondary buttons.

6. Typography System

Role	Web Size	Mobile Size	Weight	Line Height	Usage
Display	56-72px	36-44px	800/900	1.0-1.1	Landing hero, major onboarding title only
Page Title	32-40px	24-30px	700/800	1.15	Dashboard greetings and major screen titles
Section Title	22-28px	18-22px	700	1.2	Cards sections like My Classrooms, Recent Notes
Card Title	16-20px	15-18px	600/700	1.25	Classroom card titles, note titles, modal headers
Body	14-16px	14-16px	400/500	1.45	Descriptions, helper text, dashboard copy
Caption	12-13px	11-12px	400/500	1.35	Metadata, file size, time, role labels
Button	14-16px	14-16px	600/700	1.2	CTA labels and navigation labels

Font recommendation

Use Inter as the primary typeface for web and mobile. Use system fallback on mobile if performance requires it. Avoid mixing too many fonts. The app should feel premium through spacing and hierarchy, not font decoration.

- Use sentence case for buttons and labels: Generate question paper, Upload note, Ask Vaasen AI.
- Use short, friendly titles: Good morning, Arun. / Who are you today? / Welcome back.
- Avoid all caps except tiny status badges like BETA or NEW.
- Use bold only for titles, key values, and actionable text. Do not bold entire paragraphs.
- Numbers in dashboards should be visually prominent but not larger than page titles.

7. Spacing, Radius, Elevation, and Layout Tokens

Token	Value	Usage
space-4	4px	Tiny icon-label gap, progress labels
space-8	8px	Small content groups, chip gaps
space-12	12px	Mobile card internal gap, form helper gap
space-16	16px	Default component padding and mobile sections
space-20	20px	Card padding small/medium
space-24	24px	Desktop card padding, modal padding
space-32	32px	Section spacing within dashboard
space-48	48px	Major screen block spacing
space-64	64px	Hero and major web vertical spacing

Radius Token	Value	Use
radius-xs	8px	Tiny tags, notification dots
radius-sm	12px	Inputs, pills, small cards
radius-md	20px	Standard cards, bottom nav
radius-lg	28px	Hero panels, large mobile cards
radius-xl	36px	Large dashboard panels, modals
radius-hero	44px	Marketing/onboarding hero cards
radius-full	999px	Buttons, chips, avatars, progress badges

Elevation	Shadow	Use
Flat	none + border #EAD7CF	Tables, forms, settings lists
Soft	0 8px 24px rgba(160,0,0,0.08)	Normal cards on cream background
Float	0 20px 60px rgba(90,0,19,0.16)	Hero cards, active panels, modals
Glow Red	0 0 36px rgba(160,0,0,0.22)	AI CTA hover, active mascot orb
Glow Gold	0 0 32px rgba(254,202,2,0.28)	Gold badges, sparkle moments, success highlight

8. Iconography, Illustration, Imagery, and AI Mascot

Asset Type	Style Rule	Where to Use
Icons	Rounded outline icons, 1.75-2px stroke, red/gold accent for active state	Navigation, buttons, cards, settings rows
Role illustrations	Warm semi-3D style, friendly faces, Indian classroom tone	Onboarding, role selection, empty states
AI mascot	Glowing orb or friendly assistant character; red/gold orbit lines; simple face	AI assistant, AI generation, help/support, empty AI state
Subject icons	Math symbol, book, flask, globe, language Aa, laptop, exam paper	Classroom cards and note categories
File icons	PDF red, DOC blue, PPT orange, image pink, video purple	Notes lists and upload preview
Background art	Soft mesh gradients, radial glow, tiny sparkles, orbit lines	Onboarding, hero panels, profile headers, AI cards

- Do not use realistic political imagery, party symbols, flags, or campaign-like motifs.
- Do not overuse mascot in admin-heavy screens; it should help, not distract.
- Use consistent file-type icon colors across web and mobile.
- Use illustrations to explain role and purpose; never use them to cover missing product clarity.

9. Motion and Micro-Interactions

Motion Token	Duration	Easing	Use
instant	80ms	linear	Checkboxes, toggles, pressed state
fast	120ms	ease-out	Button hover, icon hover, chip selection
standard	180-220ms	cubic-bezier(.2,.8,.2,1)	Cards, tabs, modals, bottom sheets
slow	320-420ms	cubic-bezier(.16,1,.3,1)	Page transitions, onboarding panel movement
ambient	6-12s loop	linear/ease-in-out	Hero gradient drift, AI orbit glow, decorative particles

Interaction	Behavior
Primary CTA hover/web	Slight upward movement -2px, glow red/gold, gradient shift by 8-12 degrees.
Primary CTA press/mobile	Scale to 0.97 and reduce shadow. Haptic light impact if available.
Card hover/web	Lift 4px, shadow increases, small icon rotates/moves 2px.
Classroom card tap/mobile	Pressed state scale 0.98, then transition to classroom feed.
AI generating	Button becomes disabled, sparkle particles animate, progress message cycles: Reading syllabus, Finding patterns, Creating paper.
Upload progress	Use circular or horizontal progress with friendly steps: Uploading, Enhancing, Extracting text, Saving.
Notification arrival	Bell badge pops 1.08x, card slides in from top/right.

Interaction	Behavior
Role selection	Selected card expands slightly and shows glowing border.

Reduced motion rule

If user enables reduced motion, disable floating particles, orbit loops, card lift animations, and long gradient drift. Keep only opacity changes and instant state changes.

10. Accessibility and Inclusion Rules

Area	Rule
Contrast	Text on gradients must use white or dark overlay to meet readable contrast. Do not place small text directly on bright gold.
Touch targets	Mobile interactive targets must be at least 44x44px. Primary bottom nav plus button must be easy to tap.
Keyboard navigation	Web must support tab order, focus ring, escape to close modals, enter to submit.
Focus state	Use 2px red outline with 3px soft gold glow or accessible system focus ring.
Text scaling	Mobile screens must survive 120-135% font scaling without clipping core actions.
Color independence	Status must not rely only on red/gold/green. Include labels like Completed, Pending, Failed.
AI safety	AI answers must include source label and Verify important information note for teachers.
Language	Use clear simple English. Future Tamil support should not break layout.
Offline	Downloads and offline saved notes must be clearly labeled.

11. Web App Design System

Web design objective

The web app should feel like a beautiful command center, not an ERP. Use wide cards, minimal navigation, breathable panels, and warm hero sections. Admin can have more data, but the layout must remain guided.

Web Layout Area	Specification
Canvas	Use Cream Sunrise background. Keep central app container max width 1440-1500px.
Top navigation	Logo left, role-aware nav links, search center, notifications/profile right. Avoid heavy left nav for teacher/student views.
Sidebar	Allowed for Admin or dense management screens only. Use compact icon + label, not giant ERP menu.
Hero panel	Large warm gradient greeting panel at top of dashboard with stats and AI shortcut.
Cards	Use rounded 24-36px cards with soft shadows. Cards can be

Web Layout Area	Specification
	gradient for highlights and cream for content.
Data tables	Use white/cream flat surfaces with sticky header. Avoid heavy borders. Use filters as chips.
Forms	Use step-based wizard for complex admin setup. Use normal form cards for simple settings.
AI panels	Use Deep AI Glow or glass card with mascot. Always show source/context notice.

Breakpoint	Width	Behavior
Desktop XL	1440px+	Full dashboard: 3-4 columns, large hero, side panels visible.
Desktop	1200-1439px	3 columns maximum, reduce hero art size.
Tablet landscape	900-1199px	2 columns, top nav collapses secondary links.
Tablet portrait	768-899px	Single/two-column hybrid, side panels move below.
Mobile web	<768px	Use mobile app layout rules; hide dense tables behind cards.

12. Mobile App Design System

Mobile design objective

Mobile should feel like a beautiful learning companion. It must be one-thumb friendly, fast inside the classroom, and visually delightful without hiding content.

Mobile Area	Specification
Safe area	Respect iOS/Android safe area. Important CTAs must not be behind home indicator.
Top app bar	Role-aware title, notification/profile where needed, back arrow on detail screens. Height 56-64px.
Bottom nav	Five items maximum: Home, Classes, Plus, Library/Notes, Profile. Center plus is primary quick action.
Cards	Use 16-24px radius for normal cards, 28-32px for hero/profile cards.
Hero header	Use gradient greeting header on home/profile screens; avoid huge hero on every screen.
Forms	One column, labels above fields, large tap targets, sticky bottom primary CTA for long flows.
Lists	Use card lists instead of tables. Metadata should be compact but readable.
Uploads	Teacher quick upload must support camera, gallery, preview, retake, crop, and upload progress.

Mobile Screen Density	Rule
Home screens	Hero + 2 stats + 3-5 recent items. Keep quick actions visible.
Classroom feed	Large first item if important; normal card list below. Use tabs for Notes/Assignments/Quizzes.
Settings/Profile	Simple grouped rows, not dense forms. Use progressive disclosure.
AI screens	Use friendly prompt chips and input at bottom. Generated output must be readable on light surface.

13. Shared Component Library

Component	Purpose	Visual Spec	Required States
Primary Button	Main action such as Sign in, Generate paper, Upload note	Brand Flame gradient, white text, 999px radius, 14-16px semibold, icon optional right	Default, hover, pressed, loading, disabled, success
Secondary Button	Less important action	Cream glass background, red text/border, 999px radius	Default, hover, pressed, disabled
Ghost Button	Low emphasis navigation or text action	Transparent, ink text, red hover	Default, hover, active
Icon Button	Bell, back, more, filter, bookmark	44x44 mobile, 36-40 web, circular glass, active red/gold	Default, hover, pressed, badge
Role Card	Admin/Teacher/Student selection	Gradient card with role icon/illustration, right arrow, selected glow	Default, selected, hover, disabled
Classroom Card	Class summary	Gradient or cream card with class name, subject, teacher, student count, progress	Default, active, archived, no access
Note Card	Note or file item	File icon/thumbnail, title, metadata, bookmark/download, tag	Unread, downloaded, bookmarked, failed sync
AI Assistant Card	Entry to AI helper	Deep AI Glow, mascot orb, prompt chips, source note	Ready, generating, error, limited quota
Upload Tile	File/image upload	Dashed or glass card, camera/gallery/PDF icon, progress	Empty, drag-over, uploading, success, failed
Progress Ring	Syllabus/goal progress	Gold/red segmented ring with label inside	0, partial, completed, delayed
Notification Item	System/user/class notifications	Icon badge, title, body, time, unread dot	Unread, read, action required
Settings Row	Preferences and account rows	Icon, label, value, chevron/toggle	Default, disabled, changed
Bottom Sheet	Mobile quick actions	Rounded top 28px, blurred backdrop, sticky CTA	Open, close, drag, error
Modal/Dialog	Confirmations and forms	Glass/cream card, clear title, primary + secondary buttons	Small, medium, destructive
Toast/Snackbar	Short status feedback	Floating rounded card, icon, message, action optional	Success, error, info, warning
Tabs/Chips	Filter content	Pill chips; active red or cream with red text	Default, active, disabled, count badge

14. Generic Screens for All Users

Generic screen rule

Generic screens share the same visual system but change content and available actions based on role. A student profile must not show teacher analytics. A teacher settings screen must not show admin billing unless permitted.

Splash Screen

Role(s)	Admin, Teacher, Student
Platform	Mobile
Purpose	Create a memorable first impression while app loads session and cached user data.
Layout	Full gradient screen with Vaasenk logo, animated glow over open-book/learning symbol, tagline, tiny loading indicator.
Primary actions	None; auto transition to onboarding/login/home based on session.
Required states	Loading, offline cached load, forced update, app maintenance.
Permissions	All users. No protected data shown.
Design notes	Use Deep AI Glow. Keep under 2 seconds unless data restoration needs more time.

Welcome / Landing

Role(s)	Admin, Teacher, Student
Platform	Web + Mobile
Purpose	Explain Vaasenk in one emotional statement and guide first action.
Layout	Large gradient hero, friendly character or abstract learning art, CTA, trust badges, benefit line.
Primary actions	Get started, Sign in, Learn more (web optional).
Required states	Default, slow network image fallback, reduced motion.
Permissions	Public.
Design notes	Headline must be Teach more. Copy less. Keep text very short.

Role Selection

Role(s)	Admin, Teacher, Student
Platform	Web + Mobile
Purpose	Route users to the correct experience before login/register.
Layout	Three large role cards: Admin, Teacher, Student. Each card has icon, short description, arrow.
Primary actions	Select role, Continue, Back.
Required states	No role selected, selected, disabled by institution policy.
Permissions	Public before login; after login role is locked from backend.
Design notes	Use Admin Royal, Teacher Orange, Student Coral gradient cards.

Login

Role(s)	Admin, Teacher, Student
Platform	Web + Mobile
Purpose	Authenticate user and apply role-based redirect.
Layout	Cream glass card with email/phone, password, role context, SSO option, social login optional.
Primary actions	Sign in, Forgot password, Sign up, School SSO.
Required states	Invalid credentials, loading, disabled, locked account, no institution found.
Permissions	Public; authenticated users redirect away.
Design notes	Use one primary CTA. School SSO visible for admin/teacher/institution users.

Signup / Invitation Accept

Role(s)	Admin, Teacher, Student
Platform	Web + Mobile
Purpose	Allow invited or new users to create account.
Layout	Invite-aware form: name, email/phone, password, role badge, institution/classroom context.
Primary actions	Create account, Accept invite, Resend invite.
Required states	Expired invite, already accepted, password weak, phone/email duplicate.
Permissions	Public with valid invite token; open signup only if institution allows.
Design notes	For schools, prefer admin-created users/invite flow over public registration.

Forgot Password

Role(s)	Admin, Teacher, Student
Platform	Web + Mobile
Purpose	Recover access with email/phone OTP or reset link.
Layout	Simple form with email/phone, OTP step, new password step.
Primary actions	Send OTP, Verify, Reset password.
Required states	OTP expired, resend cooldown, invalid account, too many attempts.
Permissions	Public.
Design notes	Keep this calm and low-stress. No mascot needed except tiny support hint.

Notifications

Role(s)	Admin, Teacher, Student
Platform	Web + Mobile
Purpose	Show important system, classroom, AI, assignment, and mention updates.

Role(s)	Admin, Teacher, Student
Layout	Filter chips, grouped cards by Today/Yesterday/This Week, unread dots, action buttons.
Primary actions	Mark all read, open item, filter, delete/clear optional.
Required states	Empty, loading, failed fetch, permission denied, unread count.
Permissions	Role-specific notification types only.
Design notes	Use red header only in expanded notification center; list items remain cream.

Profile

Role(s)	Admin, Teacher, Student
Platform	Web + Mobile
Purpose	Show identity, role, institution, activity, achievements, and settings shortcuts.
Layout	Gradient profile header, avatar, stats, tabs/sections, edit profile button.
Primary actions	Edit profile, change avatar, view activity, open settings.
Required states	No avatar, readonly profile, offline, save success/failure.
Permissions	Users can edit own basic profile; admin can view/manage others in admin screens.
Design notes	Student profile should focus on learning progress; teacher profile on classes and notes.

Settings

Role(s)	Admin, Teacher, Student
Platform	Web + Mobile
Purpose	Control preferences, account, notifications, language, appearance, privacy, storage.
Layout	Grouped rows/tabs, toggles, dropdowns, account card, security section.
Primary actions	Save changes, toggle preferences, change password, logout.
Required states	Unsaved changes, save error, disabled setting, offline.
Permissions	Some settings role-specific; admin has institution settings separately.
Design notes	Keep settings boring enough to be clear, but use warm header and rounded rows.

Help and Support

Role(s)	Admin, Teacher, Student
Platform	Web + Mobile
Purpose	Help users solve issues quickly.
Layout	Search help articles, quick help tiles, popular topics, contact support card, live chat CTA.

Role(s)	Admin, Teacher, Student
Primary actions	Search, open FAQ, contact support, report issue.
Required states	No results, offline support unavailable, ticket created, upload screenshot failed.
Permissions	All users; admin support can include billing/institution priority support.
Design notes	Use friendly mascot; support should feel human and safe.

15. Admin Web and Mobile Screen Specs

Admin design goal

Admins need power, but not clutter. Use guided setup, clear institution-level controls, and simple management dashboards. Mobile admin can be lighter; full admin management is mainly web.

Admin Dashboard

Role(s)	Admin
Platform	Web primary, mobile summary
Purpose	Show institution health and shortcuts: classrooms, users, syllabus, AI readiness, subscription.
Layout	Hero institution card + stat tiles + setup checklist + recent activity + AI knowledge status.
Primary actions	Create class, upload syllabus, invite teachers, view reports.
Required states	First-time setup, no users, no syllabus, subscription expired, loading analytics.
Permissions	Admin only.
Design notes	Use Admin Royal gradient for setup checklist and cream cards for metrics.

Institution Onboarding Wizard

Role(s)	Admin
Platform	Web
Purpose	Set up school/college profile and required defaults.
Layout	Step wizard: Institution details → academic year → departments/classes → roles → confirmation.
Primary actions	Next, Back, Save draft, Complete setup.
Required states	Missing required fields, duplicate institution, partially saved draft, network failure.
Permissions	Admin/super admin only.
Design notes	Use progress stepper with friendly copy. Never show massive form on one screen.

Syllabus Library

Role(s)	Admin
Platform	Web primary, mobile view-only
Purpose	Upload and manage standard syllabus PDFs for Samacheer Kalvi, CBSE, or custom institution syllabus.
Layout	Library grid/list with board, class, subject, version, upload status, AI indexing status.
Primary actions	Upload PDF, replace version, map to class, archive, view AI status.
Required states	Duplicate syllabus, invalid PDF, OCR failed, indexing pending, version conflict.
Permissions	Admin upload/manage. Teachers view mapped syllabus only.
Design notes	This is intentionally admin-side to reduce teacher burden.

Sample Question Paper Library

Role(s)	Admin
Platform	Web primary
Purpose	Upload previous/sample question papers so AI understands important patterns and does not miss frequently asked areas.
Layout	List grouped by board/class/subject/year/exam type, upload panel, AI pattern extraction status.
Primary actions	Upload papers, tag exam type, map to syllabus, delete/archive, view extracted pattern.
Required states	Low-quality scan, duplicate paper, unsupported format, AI extraction failed.
Permissions	Admin upload/manage. Teachers can consume through AI generator.
Design notes	Show a clear note: sample papers guide AI but do not guarantee exact exam prediction.

Classroom Creation and Mapping

Role(s)	Admin
Platform	Web
Purpose	Create classrooms and map teachers, students, syllabus, and sample papers.
Layout	Step wizard: class info → assign teacher → map syllabus → map sample papers → invite students.
Primary actions	Create classroom, save draft, generate class code, publish.
Required states	Missing syllabus, no teacher assigned, duplicate section, academic year mismatch.
Permissions	Admin can create all. Teachers can create classrooms only if institution allows.
Design notes	Make mapping visual: Syllabus connected to classroom with AI Ready badge.

Teacher Management

Role(s)	Admin
Platform	Web
Purpose	Add, invite, activate, deactivate, and assign teachers.
Layout	Search/filter table + teacher cards + invite drawer + role/subject assignment.
Primary actions	Invite teacher, assign class, deactivate, reset password.
Required states	Duplicate email, invite expired, teacher already assigned, bulk upload failed.
Permissions	Admin only.
Design notes	Use simple table on web; mobile can show teacher cards.

Student Management

Role(s)	Admin
Platform	Web
Purpose	Bulk manage students and classroom enrollments.
Layout	Search/filter table, CSV import, class mapping, status badges.
Primary actions	Import CSV, invite students, move class, deactivate, export list.
Required states	Invalid CSV, duplicate roll number, class capacity limit, invite failed.
Permissions	Admin only. Teachers can view students in own classrooms.
Design notes	Keep bulk operations web-only for MVP.

Subscription and Billing

Role(s)	Admin
Platform	Web
Purpose	Manage plan, payment status, invoices, AI usage limits, storage.
Layout	Plan card, usage meters, invoice list, payment CTA, renewal alerts.
Primary actions	Upgrade, renew, download invoice, update billing contact.
Required states	Payment failed, expired subscription, usage over limit, invoice unavailable.
Permissions	Admin/super admin only.
Design notes	Make money-sensitive states very clear and professional. Less playful here.

Institution Analytics

Role(s)	Admin
Platform	Web
Purpose	Track app adoption and learning operations at institution level.
Layout	Charts for active teachers, notes uploaded, AI generations, classrooms, student activity.
Primary actions	Filter by date/class/subject, export report.

Role(s)	Admin
Required states	No data, delayed analytics, export failed.
Permissions	Admin only.
Design notes	Use clean charts on cream cards, not heavy gradients behind charts.

16. Teacher Web and Mobile Screen Specs

Teacher design goal

Teacher screens must make classroom work faster. The fastest actions should be: upload note, open class, ask AI, generate question paper.

Teacher Home Dashboard

Role(s)	Teacher
Platform	Web + Mobile
Purpose	Give teacher a friendly daily overview and shortcuts.
Layout	Gradient greeting hero, stats, my classrooms, recent notes, AI assistant card, quick actions.
Primary actions	Upload note, open classroom, generate paper, ask Vaasen AI.
Required states	No classrooms assigned, AI unavailable, notifications pending, offline.
Permissions	Teacher only.
Design notes	Use teacher character/mascot in hero but keep classroom cards clear.

My Classrooms

Role(s)	Teacher
Platform	Web + Mobile
Purpose	List assigned/created classrooms.
Layout	Gradient classroom cards with class, subject, students, syllabus progress, quick menu.
Primary actions	Open class, upload note, view students, class settings if allowed.
Required states	No classes, archived class, no syllabus mapped, no students.
Permissions	Teacher sees only assigned classes unless admin permissions allow more.
Design notes	Keep cards visual and friendly; avoid spreadsheet list for teachers.

Classroom Detail

Role(s)	Teacher
Platform	Web + Mobile
Purpose	Central place for notes, assignments, question papers, students, AI assistant.

Role(s)	Teacher
Layout	Header with class identity, tabs, recent notes, syllabus mapping, AI panel, student activity.
Primary actions	Upload note, ask AI, generate paper, add assignment, view students.
Required states	Syllabus missing, no notes, AI indexing pending, student list empty.
Permissions	Teacher assigned to classroom.
Design notes	Use tabs and AI assistant; keep first fold action-oriented.

Quick Upload Note

Role(s)	Teacher
Platform	Mobile primary, web supported
Purpose	Capture board photo or upload file quickly.
Layout	Camera/gallery/PDF tabs, preview, crop/retake, title, tags, classroom picker, AI enhancement steps.
Primary actions	Capture, retake, crop, upload, save as draft.
Required states	Camera permission denied, poor image quality, upload failed, no classroom selected.
Permissions	Teacher and permitted student uploader if enabled; MVP teacher only.
Design notes	This must be the fastest teacher flow. Maximum 3 steps.

Notes Library

Role(s)	Teacher
Platform	Web + Mobile
Purpose	Manage uploaded materials.
Layout	Filter chips, note cards/table, file preview, edit metadata, visibility controls.
Primary actions	Edit, delete/archive, download, share to classroom, bookmark.
Required states	No notes, failed file preview, unsupported file, delete confirm.
Permissions	Teacher can manage own notes in own classrooms. Admin can manage all.
Design notes	Use file-type colors consistently.

AI Question Paper Generator

Role(s)	Teacher
Platform	Web + Mobile
Purpose	Generate papers from mapped syllabus and admin-uploaded sample papers.
Layout	Form/wizard: class, subject, portion, pattern, marks, difficulty, question types, answer key toggle, generate.
Primary actions	Generate, preview, edit, download PDF, save to classroom.
Required states	No syllabus mapped, sample papers missing, AI timeout, quota

Role(s)	Teacher
	exceeded, invalid chapter range.
Permissions	Teacher only. Student access later phase.
Design notes	Show source inputs: syllabus version and sample papers used.

AI Classroom Assistant

Role(s)	Teacher
Platform	Web + Mobile
Purpose	Chat with classroom AI trained/retrieved from mapped syllabus, notes, and sample papers.
Layout	Chat interface with context banner, prompt chips, source citations, copy/save options.
Primary actions	Ask, regenerate, copy, save as note, create quiz, generate lesson plan.
Required states	AI not indexed, irrelevant answer, source missing, network timeout, unsafe query.
Permissions	Teacher only MVP. Students later.
Design notes	Always show: AI can make mistakes. Verify important information.

Student Doubts / Q&A

Role(s)	Teacher
Platform	Web + Mobile
Purpose	Answer student doubts linked to notes/classes.
Layout	Thread list, priority/unanswered filters, note context, reply box, voice optional later.
Primary actions	Reply, mark resolved, pin answer, attach note.
Required states	No doubts, student deleted, attachment failed, thread locked.
Permissions	Teacher for assigned classrooms; students can create own doubts.
Design notes	Keep this lightweight for MVP; do not become chat chaos.

Teacher Analytics

Role(s)	Teacher
Platform	Web primary
Purpose	Understand classroom engagement without overwhelming teacher.
Layout	Simple cards: notes viewed, students active, unread doubts, syllabus progress.
Primary actions	Filter by class/time, export basic report.
Required states	No data, data delayed, class not selected.
Permissions	Teacher sees own classrooms only.
Design notes	Make insights actionable: Students who have not opened latest note.

17. Student Web and Mobile Screen Specs

Student design goal

Students should never feel they are using an admin tool. Their app must feel like a simple learning library: classes, notes, downloads, bookmarks, doubts.

Student Home

Role(s)	Student
Platform	Mobile primary, web supported
Purpose	Show classes, recent notes, downloads, bookmarks, and deadlines.
Layout	Warm greeting, class summary, continue learning, recent notes, quick actions.
Primary actions	Open class, view note, join class, ask doubt, download.
Required states	No classes, no recent notes, offline mode, notification permission off.
Permissions	Student only.
Design notes	Keep home calm and useful. No admin metrics.

Join Classroom

Role(s)	Student
Platform	Web + Mobile
Purpose	Allow student to join by class code/invite.
Layout	Simple code input, class preview, teacher/subject info, confirmation.
Primary actions	Enter code, scan QR later, join, cancel.
Required states	Invalid code, expired invite, already joined, class full, approval pending.
Permissions	Student. Admin/teacher invite controls decide whether direct join allowed.
Design notes	Use celebratory success animation after join.

My Classrooms

Role(s)	Student
Platform	Web + Mobile
Purpose	Show joined classrooms.
Layout	Colorful class cards with subject, teacher, notes count, progress/last update.
Primary actions	Open class, filter, search.
Required states	No classes, archived class, removed from class.
Permissions	Student sees joined classes only.
Design notes	Use Student Coral and subject-specific colors.

Classroom Feed

Role(s)	Student
Platform	Web + Mobile
Purpose	Access notes and class content.
Layout	Class header, tabs Notes/Assignments/Quizzes, list of note cards, filters.
Primary actions	Open note, bookmark, download, ask doubt.
Required states	No notes, loading, offline cached, failed sync.
Permissions	Student enrolled in class.
Design notes	Do not show teacher-only AI or generate paper action.

Note Detail / Viewer

Role(s)	Student
Platform	Web + Mobile
Purpose	Read uploaded notes clearly.
Layout	File preview, title, metadata, actions, related notes, doubt entry.
Primary actions	Open, zoom, download, bookmark, share if allowed, ask doubt.
Required states	Preview failed, file unavailable, offline missing, access denied.
Permissions	Enrolled student. Downloads may be controlled by institution.
Design notes	Use distraction-free reading mode.

Bookmarks and Downloads

Role(s)	Student
Platform	Mobile primary, web supported
Purpose	Quickly access saved/offline materials.
Layout	Tabs Bookmarks/Downloads, cards grouped by class/subject, storage indicator.
Primary actions	Open, remove bookmark, delete offline file, sync.
Required states	No bookmarks, no downloads, storage full, file deleted by teacher.
Permissions	Student own saved files only.
Design notes	Show offline availability clearly.

Ask Doubt

Role(s)	Student
Platform	Web + Mobile
Purpose	Ask teacher a doubt linked to note or class.
Layout	Text input, optional note reference, attachment/image optional later, privacy hint.
Primary actions	Submit doubt, attach screenshot, cancel.
Required states	Empty question, attachment too large, teacher unavailable,

Role(s)	Student
	duplicate ask.
Permissions	Student enrolled in classroom.
Design notes	Keep tone respectful and classroom-safe.

Assignments and Quizzes

Role(s)	Student
Platform	Web + Mobile phase 2
Purpose	View assigned tasks and complete quizzes/assignments.
Layout	Assignment cards, due date, status, submit button.
Primary actions	Open, submit, resubmit if allowed, view feedback.
Required states	Deadline passed, upload failed, not assigned, quiz already submitted.
Permissions	Student enrolled and assigned.
Design notes	MVP can show placeholder/coming soon if not built.

18. Empty, Loading, Error, and Success States

State	Design + Copy Rule
Empty - no classrooms	Illustration of open book + gold spark. Copy: No classrooms yet. CTA depends on role: Create classroom / Join classroom / Ask admin.
Empty - no notes	Friendly note card placeholder. Copy: No notes uploaded yet. Teachers see Upload first note; students see Waiting for teacher.
Empty - no syllabus	Admin/teacher notice. Copy: No syllabus mapped yet. Admin CTA Upload syllabus; teacher sees Ask admin to map syllabus.
Loading - dashboard	Skeleton cards with soft shimmer. Avoid full-page spinner unless first app load.
Loading - AI	Show step messages: Reading syllabus → Checking sample papers → Creating output. Use sparkle animation.
Error - upload failed	Red inline error + Retry button + keep file preview. Do not erase user input.
Error - AI unavailable	Cream card with mascot sad state. Copy: Vaasen AI could not respond. Try again or use manual notes.
Success - note uploaded	Toast + optional celebratory gold spark. Copy: Note uploaded to Class 10 - Maths.
Success - paper generated	Preview modal with actions: Edit, Download PDF, Save to classroom.
Permission denied	Clear role-based message: You do not have access to this action. Contact your institution admin.

19. Responsive Behavior and Breakpoints

Screen Type	Web Behavior	Mobile Behavior
Dashboard	Hero + cards + 2-3 content columns. Collapse to stacked cards below tablet.	Hero compact + cards list + bottom nav. Keep only highest-priority stats.
Tables	Use full table with filters and sticky header.	Convert to searchable card list. No horizontal scroll for important actions.
Forms	Two-column allowed on wide web; wizard for long flows.	Single column, sticky CTA, progressive steps.
AI Chat	Right-side assistant panel on web; full page or bottom sheet on mobile.	Full-screen chat with prompt chips and bottom input.
File viewer	Split view with metadata/action rail on web.	Full-screen viewer with bottom action bar.
Settings	Two-pane settings on web.	Grouped list with detail screens on mobile.

20. Developer Handoff Tokens and Starter CSS

Implementation note

The design should be implemented using reusable tokens. Do not hardcode random reds, yellows, shadows, or radii inside components. Use CSS variables / Tailwind theme values.

```
:root {
  --vaasenk-red: #A00000;
  --vaasenk-gold: #FECA02;
  --deep-burgundy: #5A0013;
  --warm-ember: #FF6B1A;
  --rose-coral: #FF5C7A;
  --cream-canvas: #FFF7EA;
  --soft-blush: #FFF0F4;
  --ink-text: #24161A;
  --muted-cocoa: #7A6266;
  --line-sand: #EAD7CF;

  --gradient-brand-flame: linear-gradient(135deg, #A00000 0%, #D61F2C 45%, #FF7A1A 72%, #FECA02 100%);
  --gradient-ai-glow: linear-gradient(135deg, #3B0010 0%, #780018 45%, #A00000 70%, #FF8A00 100%);
  --gradient-cream-sunrise: radial-gradient(circle at 20% 10%, rgba(254,202,2,.25) 0%, transparent 25%), linear-gradient(135deg, #FFF7EA 0%, #FFE3D2 45%, #FFF0F4 100%);

  --radius-card: 24px;
  --radius-hero: 44px;
  --radius-pill: 999px;
  --shadow-soft: 0 8px 24px rgba(160, 0, 0, 0.08);
  --shadow-float: 0 20px 60px rgba(90, 0, 19, 0.16);
  --motion-standard: 200ms cubic-bezier(.2,.8,.2,1);
}

.vaasenk-primary-btn {
  background: var(--gradient-brand-flame);
  color: white;
  border-radius: var(--radius-pill);
  box-shadow: var(--shadow-soft);
  transition: transform var(--motion-standard), box-shadow var(--motion-standard), filter var(--motion-standard);
}
.vaasenk-primary-btn:hover { transform: translateY(-2px); filter: saturate(1.06); box-shadow: var(--shadow-float); }
.vaasenk-primary-btn:active { transform: scale(.97); }
```

```
.vaasenk-glass-card {
  background: rgba(255,255,255,.72);
  border: 1px solid rgba(234,215,207,.8);
  backdrop-filter: blur(20px);
  border-radius: var(--radius-card);
  box-shadow: var(--shadow-soft);
}
```

```
@theme {
  --color-vaasenk-red: #A00000;
  --color-vaasenk-gold: #FECA02;
  --color-deep-burgundy: #5A0013;
  --color-warm-ember: #FF6B1A;
  --color-rose-coral: #FF5C7A;
  --color-cream-canvas: #FFF7EA;
  --color-soft-blush: #FFF0F4;
  --color-ink-text: #24161A;
  --color-muted-cocoa: #7A6266;
  --color-line-sand: #EAD7CF;

  --radius-card: 24px;
  --radius-hero: 44px;
  --radius-pill: 999px;
  --shadow-soft: 0 8px 24px rgba(160,0,0,.08);
  --shadow-float: 0 20px 60px rgba(90,0,19,.16);
}
```

21. Design QA Checklist

Checklist Area	Questions to Verify
Brand	Are #A00000 and #FECA02 used clearly but tastefully? Does the product avoid political/campaign visuals?
Simplicity	Can the primary action be understood within 3 seconds? Are screens not overcrowded?
Role permissions	Does each role only see allowed actions? Are teacher-only AI tools hidden from students?
Gradients	Are gradients used for delight, not behind long text or dense tables?
Typography	Are headings, body, captions, and buttons using consistent sizes and weights?
Components	Are repeated elements using reusable components instead of one-off styles?
States	Does each screen have loading, empty, error, success, offline, and disabled states?
Mobile usability	Are tap targets 44px minimum? Is the primary CTA reachable? Does layout survive text scaling?
Accessibility	Are focus states visible? Is text readable on gradients? Are color-only statuses avoided?
AI safety	Do AI screens show source/context and verification message?
Performance	Are heavy animations optional and disabled with reduced motion?
Handoff	Are Figma components named consistently with frontend components?

22. Future Design Roadmap

Phase	Design Additions
MVP UI	Auth, role selection, dashboards, classrooms, notes, profile/settings, help/support, admin syllabus upload, teacher AI paper generator, teacher AI assistant.
Phase 2	OCR searchable notes, doubt threads, assignments, answer key editor, offline sync, richer notifications, teacher analytics.
Phase 3	Student AI assistant, parent portal, attendance, gamified revision, subject-specific visual themes, marketplace.
Design system maturity	Figma variables, component variants, coded Storybook, accessibility audit, motion library, illustration library.

Final design rule

Vaasenk must make a teacher feel: This saves my time. It must make a student feel: I can find what I need. It must make an admin feel: I can control the institution. It must make an investor feel: This is polished, scalable, and emotionally strong.
